GitHub | LinkedIn | Portfolio

Summary

Final-year B.Tech CSE student and full-stack developer (React, TypeScript, Node/Express, Firebase, PostgreSQL) who has built hostel fee and mess management systems. Completed an AI/ML internship using Python; qualified GATE 2026. Seeking a software developer role.

Education

Government Engineering College Thrissur 2023 – 2027
B.Tech, Computer Science & Engineering (APJ Abdul Kalam Technological University) *CGPA: 7.56*

Govt. Girls VHSS, Vengara, Malappuram 2022
Higher Secondary (HSE, Kerala) *94.92%*

IKTHSS Cherukulamba 2020
SSLC (Board of Public Examination, Kerala) *100%*

Internship

Intern – Introduction to AI & Machine Learning using Python 5 Jun – 30 Jun 2026
Dept. of Computer Science & Engineering, GEC Thrissur *4 weeks*

- Completed a 4-week internship on Artificial Intelligence and Machine Learning using Python, and built a Loan Approval Prediction mini project (see Projects).

Projects

SplitEase – Expense & Debt Splitting Tracker | *TypeScript, React, Express, Prisma, PostgreSQL* GitHub

- Built a full-stack app for tracking shared expenses, balances and settlements between users.
- Implemented JWT authentication, bcrypt password hashing, Zod request validation and protected API routes; wrote automated tests with Vitest.
- Built a React + Tailwind UI with Recharts visualisations; deployed frontend and backend separately on Render.

MEA Mess Marking App (PWA) | *React, Vite, Firebase Auth, Firestore, Cloud Functions, FCM* GitHub | Live

- Built a PWA with student and admin portals for daily meal marking (breakfast, lunch, supper), replacing manual registers.
- Added role-based access using Firebase Auth and Firestore security rules, with admin account approval, password reset and OTP verification.
- Wrote Cloud Functions for server-side meal marking with trusted server time, and push notifications using Firebase Cloud Messaging.

MEA Hostel Fee Management System (Demo) | *React, Vite, Express.js, REST APIs* GitHub

- Built a hostel administration prototype with admin and student portals covering registrations, admission batches, rooms, fee plans, bills and payment records.
- Developed REST APIs for room allocation with capacity validation, bill generation and fee dashboards (billed, collected, outstanding); added OTP student signup with the Resend API.

Loan Approval Prediction System | *Python, Pandas, NumPy, Scikit-learn, Streamlit* GitHub

- Trained a machine-learning model on applicant income, credit history, employment and property-area data to predict loan approval.
- Preprocessed and encoded features, saved the model with Joblib and served it through an interactive Streamlit app.

Technical Skills

Languages: C, Python, Java, JavaScript, TypeScript, SQL, HTML/CSS
Web: React, Node.js, Express.js, Django, Tailwind CSS, REST APIs, JWT authentication
Databases & Cloud: PostgreSQL, Prisma, Firebase (Auth, Firestore, Cloud Functions, Hosting), Vercel, Render
ML & Tools: Pandas, NumPy, Scikit-learn, Streamlit, Git, GitHub Actions, Vite
Core CS: Data Structures & Algorithms, Operating Systems
Spoken: English, Malayalam, Hindi, Arabic

Achievements & Activities

- Qualified GATE 2026 (score: 33).
- Team Lead, Smart India Hackathon 2025; team cleared the college-level round.
- Football: zonal title (2024, 2025) and APJKTU interzone title (2025) with the college team.
- Media Committee member, IEDC GECT Summer Startup Festival 2024 and OASIS Pain & Palliative Club.
